Femi Odunaiya

Software Engineer | AI agent systems and agent tooling | Rust · Laravel · PostgreSQL

Lagos, Nigeria (GMT+1), working remotely
0xnagato.github.io · github.com/0xNagato · linkedin.com/in/femi-odunaiya-3b1307a8

SUMMARY

I build AI agent systems and the tools that keep them honest. I came to engineering from a bank's legal and credit teams, where a claim without evidence was worth nothing. I build software the same way.

Open to remote work: full-time roles, contracts and client projects. Comfortable with UK and EU hours.

EXPERIENCE

Independent Software Engineer · Self-employed, remote — 2022 to present

- Runs a self-hosted multi-agent assistant on OpenClaw: 8 agents with separate workspaces and memory, reached over WhatsApp, iMessage and Telegram, with automatic failover between model providers. Wrote openclaw-message-queue, a plugin that queues and retries replies when a provider rate-limits.
- Open-source tools for AI agents, MIT licensed. ctxgrep is code search in Rust that fits a token budget, ranks definitions first and reports how many matches it left out. skill-lint finds agent skills and tools that will never be picked or can do damage without confirmation. logdex indexes logs too large to open. confound-check is a review procedure for causal claims.
- game-compare-ingest: the data pipeline behind a game price-comparison platform, about 63,000 lines of Rust in 76 programs, pulling from 12 provider APIs into PostgreSQL, with four automated build and test workflows. game-compare: its web application in Laravel 12, React 19 and Inertia.
- A real-time trading system in Rust for five-minute Bitcoin prediction markets, built with AI coding agents under a written operating contract: 502 Rust source files and 1,925 test functions, paper trading beside live trading, and an append-only log of every result.
- Also architecture-studio (a one-line brief to floor plans, site sheets, 3D renders and a BIM model, with no paid services), qvac-doc-qa (document Q&A with a model that runs on the user's machine) and inhouse-ai-php (a hospitality booking agent that calls a reservation system's functions).

Full-Stack Developer (contract) · PrimaVIP, remote — Jul 2025 to Sep 2025

- Worked on PRIMA, a dining concierge platform, as part of the engineering team.
- Back-end features on the platform's Laravel 11 and Filament code.
- The concierge booking flow in React and TypeScript, built from Figma designs.
- WhatsApp and messaging integrations, and the itinerary tracker.

Credit Analyst, Credit Administration · Access Bank Plc, Lagos — Nov 2020 to Sep 2022

- Reviewed drawdown documents against the facility approval memo, the bank's credit guide and CBN rules, including the Revised Guide to Bank Charges.
- Maintained customer credit lines on Flexcube, the bank's core banking system, after approval and drawdown.
- Maintained the collateral register, including insurance and valuation records.
- Generated CRMS codes so loans and other facilities were registered with the Central Bank.

Legal Officer, Corporate Counsel · Access Bank Plc, Lagos — Sep 2017 to Nov 2020

- Issued contingent liability instruments for the bank's units, including guarantees, indemnities and letters of credit.
- Reviewed and drafted legal documents and gave corporate legal support across the bank.
- Litigation team: kept the litigation schedule, tracked updates from external lawyers, and briefed lawyers on new cases and law enforcement agency invitations.
- Perfection team: made sure property pledged as collateral was registered so the bank could enforce its security.

Associate · Abraham & Co (Barristers & Solicitors) — Oct 2015 to Sep 2017

- Drafted the Digital Broadcasting Agreement for the operation and maintenance of Nigeria's digital terrestrial (DTT) and digital satellite (DSAT) television platforms, part of the digital switch-over, and content aggregation, transmission and set-top box distribution agreements.
- Researched and drafted legal opinions.

NYSC Corps Member · Anu Eso & Co Nov 2014 to Oct 2015

- Appeared in court as co-counsel and attended mediation sessions. Drafted legal opinions. Company secretarial work: board and annual general meetings, minutes and annual returns. Perfected clients' titles at the Lands Registry, Alausa.

Earlier: externship at Adepetun, Caxton-Martins, Agbor & Segun (2014); internships at Banwo & Ighodalo (2012) and Aluko & Oyebode (2009 and 2011).

EDUCATION

Access Bank School of Banking Excellence, Entry Level Training Program Apr 2017 to Aug 2017

Nigerian Law School, Barrister at Law (BL) Oct 2013 to Aug 2014

Durham University, LLB (Hons) Law, Second Class Upper (2:1) Oct 2010 to Jun 2013

Ardingly College, West Sussex, International Baccalaureate Diploma Sep 2008 to Jun 2010

CERTIFICATES

Google Cybersecurity Professional Certificate, Google on Coursera, coursera.org/verify/professional-cert/8VZBLE82IWMO Sep 2026

Claude Certified Associate: Foundations, Anthropic, credly.com/badges/3d0b2b57-186b-4f68-9f04-2349f63b48a3 Jul 2026

Rust Programming Specialization, including Rust for Large Language Model Operations, Duke University on Coursera Apr 2024

LFEL1002: Getting Started with Rust, The Linux Foundation Apr 2024

SKILLS

- Languages: Rust, Python, PHP, TypeScript, SQL
- Frameworks and data: Tokio, Laravel, Filament, React, Inertia, PostgreSQL, Redis, Docker, Git
- AI agents: multi-agent systems on OpenClaw, MCP servers, AI coding agents, failover across model providers
